MBA Green Builders Professional Directory

The Master Builders' Association Green Builders Professional Directory is a listing of green credentialed professionals employed in Western Pennsylvania's construction industry. This publication was created, and is maintained by, the Master Builders' Association Green Builders Committee.

The mission of the Master Builders' Association Green Builders Committee is to improve our region's construction community by uniting, promoting and creating a pool of professionals that facilitate healthy, sustainable living while building our region.

This directory is provided to assist Western Pennsylvania in locating professionals that can apply sustainable best practices to construction projects, and possibly certifying buildings through the LEED rating system. The professionals in this document have demonstrated their knowledge to facilitate green building practices and principals on a construction project. Many have verified their knowledge of the LEED certification process on the LEED Professional Accreditation exam or the LEED Associate exam. If you have a professional at your firm seeking to obtain a green professional accreditation, you are advised to check with MBA's website for upcoming educational opportunities or to contact the Green Builders Committee directly for more information.

Every attempt is made to feature accurate information in this publication. With that sentiment in mind, if you discover an incorrect item, or if you would like more information on the Green Builders Committee, please contact us.

Committee Members: Michael Kuhn, Jendoco Construction Corporation; Phil Linton, PJ Dick Incorporated; Adam Ramsey, Wyatt Incorporated; Scott Rowland, Langan Engineers & Environmental Services; Michael Tarle, Massaro Corporation; and, John West, Mascaro Construction Company, L.P.
